

# MUHAMMAD BAHRUL WIDAD

## FULL-STACK DEVELOPER

Semarang, Indonesia | bahrulwidad.work@gmail.com | github.com/bahrulwd | widad-portfolio-eta.vercel.app

### PROFESSIONAL SUMMARY

Information Systems undergraduate (GPA 3.78/4.00) with hands-on internship experience building Laravel and React applications. Skilled in REST API development, relational database design, token-based authentication, CMS workflows, and responsive TypeScript interfaces. Built end-to-end products spanning administrative systems, productivity tools, and decision-support applications.

### EXPERIENCE

#### CV. Kencana Adhi Saka — Web Development Intern

5 Jan – 16 Jul 2026

Sukoharjo, Central Java

- Designed and developed two full-stack systems: a digital correspondence platform and a company portfolio CMS using Laravel, React, TypeScript, and MySQL.
- Implemented incoming/outgoing letter workflows, maker-checker review, document auto-versioning, integrated PDF viewing, centralized archives, and real-time letter-number previews.
- Built CMS modules for projects, galleries, FAQs, inquiries, and visitor analytics, enabling internal teams to update content and manage prospective-client messages independently.
- Designed the database structure and coordinated directly with management to translate document-approval and company-profile requirements into application workflows.

### SELECTED PROJECTS

#### Arthara — Pre-Spending Decision Support Web App

Jul 2026

Next.js 16, React 19, TypeScript, Prisma, MariaDB/MySQL, Tailwind CSS

- Built a full-stack behavioral-finance application that helps users evaluate planned purchases, identify recurring expense leaks, and monitor a calculated financial health score.
- Developed Next.js API route handlers, relational schemas, validated forms with Zod and React Hook Form, and interactive analytics dashboards with Recharts.

#### Nexa — Productivity & Task Management SaaS MVP

Jun – Jul 2026

React 19, TypeScript, Laravel 11, MySQL, Laravel Sanctum, Tailwind CSS

- Built a decoupled SPA and REST API with token authentication, task/subtask management, workload monitoring, focus sessions, and personalized onboarding.
- Implemented a weighted priority-scoring algorithm and backend aggregation for weekly workload data, including hierarchical subtask updates in a single API workflow.

### EDUCATION

#### Universitas Negeri Semarang — B.Sc. in Information Systems

2023 – Present

GPA: 3.78/4.00

### PUBLICATION & ACHIEVEMENT

- Co-authored “Sistem Pendukung Keputusan Pemilihan Saham Perbankan Indonesia Menggunakan Hybrid AHP-TOPSIS dengan Analisis Sensitivitas Temporal,” JUSIBI Vol. 8 No. 1, Jan 2026; contributed to MCDM methodology, temporal tracking, and sensitivity analysis.
- 1st Place, UI/UX Design Competition — Kamabea FMIPA UNNES, 2026.

### LEADERSHIP

#### I-Secret ILKOM UNNES — Head of Media & UI/UX Division

2025

- Led visual communication and publication assets, coordinated event documentation, and contributed UI/UX direction for the organization's company-profile website enhancement.

### TECHNICAL SKILLS

**Languages:** PHP, TypeScript, JavaScript, HTML, CSS, SQL

**Frameworks & UI:** Laravel, React, Next.js, Vite, Tailwind CSS

**Backend & Data:** REST APIs, Laravel Sanctum, RBAC, MySQL, PostgreSQL, Prisma ORM, relational data modeling

**Tools & Delivery:** Git/GitHub, Postman, Figma, Vercel, cPanel, VPS deployment, API and functional testing
